Reproductive Services

Maine Equine Associates provides complete reproductive services for mares. Below the costs are outlined.

Artificial insemination and the shipping of chilled or frozen semen has opened up myriad opportunities for the owners of mares in all corners of the world. It can often be difficult, however, to recognize heat and predict ovulation. Furthermore, even mares with obvious cycles can fail to ovulate reliably.

Service	Daily Cost	Monthly Estimate
Serial Palpation and Ultrasound	\$120.00	\$840.00
Breeding (Cooled Semen)	\$60.00	\$60.00 - \$120.00
Professional Fee/Call Charge	\$70.00 - \$85.00	\$700.00 - \$950.00

Additional Fees and Costs (if necessary):

- Uterine Biopsy
- Uterine Culture
- Uterine Flush
- Reproductive Drug Prescription and Administration
- Bloodwork
- Other Diagnostics or Treatments

Shipping of semen is the responsibility of the mare's owner. We will be available to accept shipments at any time. However, if the shipment requires a pick up at the airport, a travel fee of \$120 to Portland or \$180 to Bangor will be charged. This service may not always be available, depending on scheduling.
